APPENDIX

# INTRODUCTION

This appendix of the budget of the United States consists of two parts: (1) schedules of the detail of personal services; and (2) statements on passenger motor vehicles and aircraft.

## DETAIL OF PERSONAL SERVICES

The schedules which show the detail of personal services reflected in the budget are furnished to the Congress pursuant to section 204 of the Budget and Accounting Act, 1921 (31 U.S.C. 581).

Positions of a permanent or indefinite duration are distinguished from other employment. Any position is counted if it is occupied or will be occupied at any time during the year. Therefore, the number of positions shown may exceed the maximum number of positions at any one time, and nearly always exceeds the maximum number of employees at any one time, due to delays in filling vacancies, leave without pay, and similar factors.

Grades and their respective salary ranges are reflected in the stub column; the most commonly used grade series, the general schedule grades, is abbreviated "GS-----." Titles are shown for positions with a base rate of $12,210 or above. Salaries are reported at the rate effective for the greater part of the year. Since within-grade salary advancements occur at various times during the year, the rates shown will not be exactly equal to the compensation earned, but the difference is taken up in the "Deduct lapses" line. That line also covers savings due to vacancies, etc., and is offset in part by terminal annual leave payments.

Separate entries cover employment in positions other than permanent (temporary and intermittent employment). Other obligations for personnel compensation are also detailed. Because most annual salaries are by law the rate for 52 weeks, an additional entry covers the extra earnings whenever there are regular workdays above the 52-week base. For employees with a Monday-through-Friday workweek, there were 2 extra days in 1960, and there will be 1 extra day in 1961 and none in 1962.

The final amounts in the personal services schedules agree with the entry for "Total personnel compensation" in the object schedules of the budget. In cases where a consolidated schedule in the appendix contains personal services which are reflected in two or more object schedules, a distribution by account title follows the total line.

## PASSENGER MOTOR VEHICLES AND AIRCRAFT

The statements on passenger motor vehicles and aircraft are furnished to the Congress pursuant to section 16 of the Administrative Expenses Act of 1946 (5 U.S.C. 78).

Passenger motor vehicles include automobiles, station wagons, buses, and ambulances. The statements show the number to be purchased in the coming year and the cost, the exchange allowances estimated, and the number of currently owned vehicles to be continued in use. The cost of hire is shown with separate columns for hire from interagency motor pools (such as those operated by the General Services Administration) and from commercial sources. As required, the statements identify the public purposes for which the vehicles are intended, and the officials and employees by whom they are to be used.

The statements on aircraft are similar to those on motor vehicles, except that they show estimates for maintenance and operation costs and omit estimates for hire, in accordance with the law.

Combat and tactical vehicles and aircraft of the Armed Forces are omitted.
